NATIONAL CONFERENCE ON INDUSTRIAL TRIBOLOGY

19 – 20 JULY 1984

PROCEEDINGS

Organised by

Bharat Heavy Electricals Limited

Corporate Research & Development Division

Vikasnagar, Hyderabad-500 593

NATIONAL CONFERENCE ON INDUSTRIAL TRIBOLOGY

19 – 20 JULY 1984

PROCEEDINGS

- Organised by • **BHARAT HEAVY ELECTRICALS LIMITED**
- Cosponsored by • **INDIAN OIL CORPORATION LIMITED**
- **LUBRIZOL INDIA LIMITED**
 - **INDIAN INSTITUTE OF PETROLEUM**

**NATIONAL CONFERENCE ON INDUSTRIAL TRIBOLOGY
(19-20 JULY, 1984)**

STEERING COMMITTEE

Shri M.K. Sridhar, BHEL, New Delhi ... Chairman

Dr. J. Bhatia, Balmer Laurie Co. Ltd., Calcutta
Shri P.K. Goe', PCRA, New Delhi
Dr. A. Gopalakrishnan, BHEL, Hyderabad
Dr. I.B. Gulati, I.I.P., Dehradun
Dr. B.K. Gupta, MNREC, Allahabad
Shri K. Kurian John, BHEL, Hyderabad
Shri O.K. Juneja, BPC, Bombay
Dr. Subir Kar, IIT, Bombay
Shri C.K. Khot, BHEL, Hyderabad
Shri K.V. Krishnamurthy, RDSO, Lucknow
Dr. B.C. Majumdar, IIT, Kharagpur
Dr. M.A. Mannan, Osmania University, Hyderabad
Shri Suresh Mehta, HPC, Bombay
Shri T.K. Mukhopadhyaya, IOC, Faridabad
Dr. B.C. Nakra, IIT, Delhi
Shri I.P. Narang, IOC, Faridabad
Shri M.V. Pandit, BHEL, Bhopal
Dr. B.S. Prabhu, IIT, Madras
Shri R.A. Rao, Lubrizol India Ltd., Bombay
Dr. P.K. Rohatgi, RRL, Bhopal
Shri V.R. Seshu, HPC, Bombay
Dr. A. Sethuramiah, IIP, Dehradun
Dr. D.V. Singh, University of Roorkee, Roorkee
Shri K.C. Vaishya, BHEL, Hardwar
Dr. R. Vasudevan, BHEL, Tiruchy

Shri T. Muralidhara Rao, BHEL, Hyderabad ... Organising Secretary

NATIONAL CONFERENCE ON INDUSTRIAL TRIBOLOGY 1984 PROCEEDINGS

CONTENTS

FLUID FILM BEARINGS — FF

	<i>Page No</i>
Design of Thrust and Journal Bearings for Large Steam Turbines— <i>Klaus Stuber</i>	1.1-1.10
Effect of Oil Feed Pressure on the Performance of Hydrodynamic Journal Bearings an Experimental Investigation— <i>S.K. Verma, K. Dargaiah</i>	2.1-2.8
Dynamic Characteristics of Finite Hydrostatic Porous Oil Bearings Considering Tangential Velocity Slip— <i>A.K. Chattopadhyay, B.C. Majumdar</i>	3.1-3.8
Piezoviscous Effects on the Performance of 120° Partial Journal Bearings— <i>S.C. Jain, D.V. Singh, R. Sinhasan</i>	4.1-4.7
Relative Performance of several Bearing Bore Profiles for High Speed Rotors— <i>Dr. Ajeet Singh, Dr. B.K. Gupta</i>	5.1-5.8
Performance Characteristics of Tilted Noncircular Hydrodynamic Bearings in Laminar and Superlaminar Regimes— <i>S.C. Soni, R. Sinhasan, D.V. Singh</i>	6.1-6.8
Effect of Support Flexibility on the Stability of Finite Circular Bearing— <i>M.K. Sharma, Ajeet Singh</i>	7.1-7.8
Critical Speeds, Unbalance Response and Onset of Instability of Multi Span Multi Rotor Systems— <i>K.S. Ramakrishnan, B.S. Prabhu</i>	8.1-8.9
Investigations on Rotor Vibrations with Viscoelastically Damped Supports— <i>B.C. Nakra & D. Subrahmanyam</i>	9.1-9.4
Guide Bearings for Vertical Shaft Hydrogenerators— <i>A.B. Thoke</i>	10.1-10.6
Care and Maintenance of Plain Journal Bearings— <i>G.K. Gulati</i>	11.1-11.5
Rotating Sump Type Journal Bearings for Hydro Turbines Design and Operating Experience— <i>Jawahar Lal Khosa</i>	12.1-12.6
Investigation on the Influence of Inlet Chamfer in Hydrodynamic Thrust Bearings— <i>T. Muralidhara Rao, K.K. Chaturvedi, N. Santanam, T.G. Rajaswamy</i>	13.1-13.8
Computer Program for Optimization of Tilting Pad Thrust Bearing Design for CAD Application— <i>K.K. Chaturvedi</i>	14.1-14.8
An Analytical Approach to the Design of Tilting Pad Thrust Bearings for High Speed Operation— <i>T.G. Rajaswamy</i>	15.1-15.9
Inertia effects in Squeeze Film between two Circular Plates with Power Law Lubricants— <i>Kh. Zaheeruddin, Said K. Ayyubi</i>	16.1-16.4
Analysis of a Hydrostatic Thrust Bearing with MDR Control— <i>Dr. A. Satyanarayana, Dr. B.G. Krishna Reddy</i>	17.1-17.8
Latest Trend in the Design and Operation of Large Thrust Bearings of Hydro Power Stations— <i>Banwari Lal</i>	18.1-18.7
Pneumatic POD—An Application of Aerostatic Bearing— <i>V. Kamala & Sanjay Agarwal</i>	19.1-19.9
Thermo-Hydrodynamic Solution for Performance Prediction of Thrust Bearing— <i>A.K. Bansal, S. Biswas</i>	20.1-20.4

ROLLING ELEMENT BEARINGS—RE

	<i>Page No</i>
Early detection of defects in Anti-Friction Bearings— <i>Har Prashad, Malay Ghosh, S. Biswas</i>	1.1-1.0
Recent developments in the Condition Monitoring of Rolling Bearings and some case studies on the Failure Diagnosis and Quality assessment of Ball Bearings— <i>P. Rajendran, S. Swarnamani, B.S. Prabhu</i>	2.1-2.7
✓ Test Machine for Anti-Friction Bearings— <i>Har Prashad, M. Hussain</i>	3.1-3.8
Rolling Element Bearings—An analysis of Parameters for Measurement of Performance— <i>V. Satyanarayana</i>	4.1-4.8
Rolling Bearings for High Voltage Vertical Motors— <i>P.N. Kapoor, R.C. Sharma</i>	5.1-5.6
Effects of consistency variation of Power-Law Lubricants in Roller Bearing under Lightly and Heavily Loaded conditions — <i>J.B. Shukla, Peeyush Chandra, K.R. Prasad</i>	6.1-6.6
Rheology of Lubricants under High pressure Elastohydrodynamic contact— <i>Dr. L. Nayak</i>	7.1-7.8

LUBRICANTS AND ADDITIVES—LA

Recent Trends in Hydraulic Fluids—High Water Based Fluids— <i>B.V. Raman, R.A. Rao</i>	1.1-1.5
Cold Rolling Oil Performance—A Comparison between Laboratory Rolling Mill and Disk Machine— <i>B.M. Shukla, S.D. Phatak, A. Sethuramiah</i>	2.1-2.8
A Supercharged Kirloskar Engine Test for Evaluation at Heavy-Duty Engine Oils—Development of Test Technique— <i>R.K. Sharma, Arjun Kumar, P.C. Nautiyal & S. Singhal</i>	3.1-3.7
Characterisation of Lubricating Greases by Differential Scanning Calorimetry— <i>D.K. Singh, A.K. Govila</i>	4.1-4.2
Effect of Molybdenum Disulphide and Synthetic Graphite on Coefficient of Friction of Lithium Soap Base Grease— <i>D.K. Singh, S.B. Srivastava, A.K. Govila</i>	5.1-5.5
⊕ Performance Evaluation of Zinc Dialkyldithiophosphates by Amsler Test Rig— <i>V.P. Wagh, N.M. Patil & K.L. Mallik</i>	6.1-6.4

PLANT MAINTENANCE TECHNOLOGY—PM

Few Case Studies on the Failure Analysis of Tribological Components in Industrial Turbine and Compressor Sets— <i>T. Chander, Siddhartha Biswas</i>	1.1-1.7
Aeration and Foaming aspects of Lubricants in Hydrodynamic Bearings— <i>N. Santanam</i>	2.1-2.5
Influence of Oil Flow Characteristics on Bearing Performance —A Case Study— <i>M.V. Pandit</i>	3.1-3.4
Use of Oil Baffles for Bearing Lubrication of Vertical Hydrogenerator— <i>Utpal Chatterjee</i>	4.1-4.5
Unstability Phenomenon of Turbo Blower—A Case Study— <i>A.K. Reddy</i>	5.1-5.6
Tribological Aspects of Heavy Duty Fans — <i>V. Alagappan, K. Manoharan, K. Anantharaman</i>	6.1-6.8
Temper Colouring of Tin Babbit and Few Other Elements — <i>Siddhartha Biswas, R. Krishnan</i>	7.1-7.8
Rajasthan Atomic Power Station Turbine Bearings Lubrication System Problems and Condition Monitoring— <i>R.S. Choudhary, D.K. Sisodia</i>	8.1-8.7
A critical review of Optical and Laser Techniques for Diagnostic and Investigative Applications in Tribology— <i>Murthy Gutta, G. Venkata Rao</i>	9.1-9.9

SEALS, BRAKES AND OTHER TRIBOLOGICAL COMPONENTS—SB

	<i>Page No</i>
Centrifugal Inertia Effects on Radial Face Seals— <i>Prawal Sinha, T.S. Nailwal</i>	1.1-1.5
Investigation on the Effect of Non-Newtonian Fluids on the Performance of Face Seals— <i>Dr. Kalluri S. Murthy, Dr. Subir Kar</i>	2.1-2.7
Evaluation of Brake Pad wear of Hydrogenerator Brakes— <i>Hazarilal, K.K. Chaturvedi</i>	3.1-3.3
Role of Piston and Rod Seals towards improved performance of Reciprocating Compressors— <i>S.N. Dwivedi</i>	4.1-4.8
Performance Characteristics of Double Lip Oil Seals for Dusty Environments— <i>N. Santanam</i>	5.1-5.7

FRICITION AND WEAR—FW

A New Test Rig to study Piston Ring-Liner and Basic Boundary Lubrication— <i>Narinder Kumar Garg, O.P. Chawla, J.P. Sharma</i>	1.1-1.5
Investigation of Behaviour of different-grade Lubricating Oils at different temperatures, when used in Diesel Engines— <i>P.K. Patel, P.K. Shah</i>	2.1-2.6
A New Approach to Study Frictional Losses in Gears— <i>V.K. Jain, V.P. Sharma & A. Sethuramiah</i>	3.1-3.7
Effect of Roughness, Clearance, Oil and Material Composition on the Frictional Characteristics of Sintered Bearings— <i>Dr. R. Raman, P. Iyamperumal</i>	4.1-4.8
On Some Wear Aspects of Sprayed Metal Surfaces— <i>M.M. Mayuram, R. Krishnamurthy, G.V.N. Rayudu</i>	5.1-5.5
Friction and Wear Characteristics of Plasma Sprayed Nickel-Graphite Composite Coatings— <i>Mohammad Ghouse, D. Maheswar Reddy</i>	6.1-6.8
French Surface Treatments for Improved Tribological Characteristics— <i>Bernard Grellet, Dr. V. Gopal & K. Balasubramaniam</i>	7.1-7.3
Solid Lubrication of Low Speed Mechanisms for Space Application— <i>B. Subramanian, V.R. Sambamurthy, Dr. B. Kanakaraju</i>	8.1-8.6
Statistical Planning of Reliability of Wear Data Using Radiotracers— <i>A.K. Gondal, P.C. Nautiyal & S.S. Singhal</i>	9.1-9.4
Ion-Plated Lead—Tin Self Lubricating Alloys— <i>B.K. Gupta & Sundeep Kulsrestha</i>	10.1-10.4
Fatigue performance of Gears treated by Composite processes— <i>R. Natarajan, R. Krishna Murty</i>	11.4-11.5
Friction wear and Film strength studies on Lubrication using Oscillating Type Friction and Wear-Tester— <i>V. Martin, A.K. Mehta, I.P. Narang</i>	12.1-12.7
Studies on Friction and Wear of sliding carbons— <i>K.K. Datta, R.L. Seth, C.V. Mohandas & C.L. Verma</i>	13.1-13.4
Tribological Studies on PTFE, and its composites— <i>S.K. Verma, K.L. Awasthy</i>	14.1-14.6
